

Pros and Cons of Nature-Based Carbon Offsets for Conservation Financing

A virtual forum at the World Conservation Congress
7 Sept. 2021 09:00 CET Virtual Channel 1, Session 43273

Speakers

Eriel Deranger
Executive Director
Indigenous Climate
Action
Canada

Prof. Peter Macreadie
Centre for Integrative
Ecology
Deakin University, Australia

Prof. Brendan Mackey
Director
Griffith University Climate
Change Response Program
Australia

Dr. Barbara Haya
Berkeley Public Policy
Goldman School
USA

Joseph Pallant
Director
Climate Innovation
Ecotrust Canada

Gareth Phillips
Climate & Environment
Finance
African Development Bank
Abidjan, Ivory Coast

Fernando Camacho Rico
General Director
Comisión Nacional de Áreas
Naturales Protegidas
(CONANP), Mexico

Moderators

Dr. Risa Smith
Leader, Protected Areas
Climate Change
Specialist Group, WCPA

Jay Ritchlin
Director-General Western
Canada
David Suzuki Foundation

This session will explore lessons learned from over 25 years of nature-based carbon offsets to reduce GHG emissions and provide conservation benefits. Successful programs, gaps in biodiversity safeguards, challenges with credible accounting and effects on human rights will be considered.
