

Smallholders as green Entrepreneurs in Conservation Landscapes

MoMo4C session at World Conservation Congress in Marseille

4 September 2021, 10:30-12:00

Pavilion of IUCN NL at the World Conservation Congress: H3 IUCN NL Pavilion

Online participation: <https://www.youtube.com/c/IUCNNL>. Log in with a google account

Online questions: use YouTube chat when they are logged into the Youtube channel

Moderator: Angélique Laskewitz

Facilitator: Jan Willem den Besten

Technology and facilitation: Jules Koppen

Speakers:

Luis Primo - TBI

Daryl Bosu – A rocha Ghana

Dia Mawesti – Tropenbos Indonesia (online)

Evans Sampene – Tropenbos Ghana (online)

Pauline Nantongo – Ecotrust Uganda

Roberty Panphyl – WWF Cameroon

Bernabé Fondo – WWF Mozambique

The programme Mobilizing More for Climate (MoMo4C) develops business cases for ecosystem-based climate adaptation and mitigation initiatives, implemented by IUCN NL, Tropenbos International and WWF in 6 landscapes in Africa and Southeast Asia. But **how** can we engage local entrepreneurs? **How** can MoMo4C ensure that climate solutions are inclusive? **How** can local communities that are the most vulnerable to the impacts of climate change be not only included but made themselves the drivers of climate resilience in their landscapes? MoMo4C and the CGIAR research program on Forests, Trees and Agroforestry (FTA), analysed three successful cases of fostering entrepreneurship among smallholders that work on climate and biodiversity solutions in three of the MoMo4C landscapes. IUCN NL, Tropenbos International and WWF and the implementing partners in the 6 landscapes will share lessons and opportunities drawn from the different cases and discuss implications for upcoming ambitions of the programme.

RESEARCH PROGRAM ON Forests, Trees and Agroforestry
